Chilton Medical Center FAQ by Glen Rock resident who received her vaccination done at this site.

Where do I park?

On entering the driveway, the road for people needing vaccinations is very well marked with huge signs. It takes you to ample parking spaces set aside for those with covid vaccination appointments. Those spots are near the front door of the building where you will receive your vaccine.

General information

After entering the building lobby, appointees are called to a desk where their appointment is confirmed. If you have come with someone, they can accompany you.

Appointments are confirmed with the appointee's ID and if you have health insurance that information will be taken. Your temperature will be taken.

You will be asked which arm you prefer them to use for your shot and told to let it hang loose and not tighten any muscle in your hand or arm. Then you will receive your vaccination.

After receiving your vaccine, you will be given a card with a record of your first vaccination and an appointment already set-up for your second shot.

You will then be directed to the socially-distant waiting area and instructed to wait for 15 to 20 minutes to ensure you experience no negative side effects to the vaccine. Staff is all around should you feel any ill effects, but no one will check on you unless you ask. Once the required time has passed, and you feel well, you will be free to leave!

Altogether, the whole visit took approximately 35 minutes from beginning to end. Chilton was extremely well organized. The building was immaculate. Everyone was proficient in their work and pleasant in their manner. I cannot compliment Chilton Hospital enough.
